AS OUR WORLD CONTINUES TO EVOLVE, WE SEE WOMEN PUSHING BOUNDARIES AND CARVING OUT A NAME FOR THEMSELVES. INSTEAD OF BEING CONFINED BY TRADITIONAL SOCIETAL NORMS, WOMEN ARE NOW EMBRACING THEIR PASSIONS AND FORGING THEIR OWN PATHS. AND WHILE THEY'RE BUSY DOING A COMMENDABLE JOB AT IT, THEY SHOULD NEVER FORGET TO TAKE OUT TIME TO HONOUR THEIR MILESTONES – HOWEVER SMALL OR BIG

For her, it's all about having faith in the strength you carry within yourself – a thought that best resonates with gold. She is actively associated with Cancer support groups and working towards Cancer awareness among the people and talking about mental health. She recently started her Instagram account (@behindthecancerribbon) for cancer awareness and advocacy.

“Life Happens While You're Busy Making Other Plans” truly depicts the paradox of my life. While I was truly basking in the peaceful ride of my life, enjoying my career and weaving dreams for the future, I was diagnosed with “Breast Cancer” on 27th March 2018. Never in a million years did I think I would be a cancer patient at such a young age. Shock waves ran through me and I was completely paralysed for a moment or two. However deep the pain was, but I have decided to stay positive. Although I know this will be the hardest and longest journey of my life, one thing I truly have realised is, “You are You; and You bring You in every You of Your Life”. I know one day all of this will belong in the past and thinking of that day only makes me want to Dream again of my future. One thing I have continue to learn in my journey is to NEVER STOP BELIEVING In MAGIC of LIFE and LOVE.

TALK WITH

- MS. RINAA PETER

Q. You are a strong and independent woman but post recovery what one valuable thing you learned .

A. The definition of happiness. That wanting more and always striving for what's next will never compare to what you already have. Cancer taught me that no matter what is taken from you on the outside...it can never change who you are on the inside. So stop waiting for tomorrow. Stop making excuses. And get out there and live! I mean really LIVE! Because this life is what you make of it...so let's make it unbelievable. Take the time to stop and celebrate life a little more often. Realize you don't have to work so hard to find happiness. Work smarter and not harder and celebrate and enjoy the little things in life. One thing I still embraces today is - What finding the 'can' in cancer means to me is there's something good even around all of the terrible things. Everything happens for a reason. We may not understand it now, but we will. The tough times have made me the person I'm today. When you've gone through lots of bad things you get really good at dealing with them.

Q. Today women is definitely surpassing all the obstacles but in midst of that they somehow forgot to manage their own lifestyle , what piece of advice you want to give them .

A. Women are valuable contributors to our society. Amid all the accolades, accomplishments, and service, it is important that women also take the time to take care of themselves. Education, screenings, and regular check-ups can assist with early detection, prevention, and a better quality of life. Some of the most common health issues these days that women battle includes breast cancer, cervical cancer, and cardiovascular disease. Having a healthy body will allow for the energy and mental clarity to continue making such powerful and positive impacts in the world.

Q. Can you elaborate about your magazine "Arivaalifestyle"

A. Arivaa Lifestyle is a digital Lifestyle magazine focusing mostly on Interior & architecture, art & culture, travel & food, home decor & technology related Lifestyle aspects featuring the best in industry & brands from globally. Readers & Subscribers get the flavour of the latest trends and developments. Not only does it showcase the best in segment from all across the world but it also gives you an opportunity to overhaul your own collection from the excellent collections shared. For Brands it's an excellent platform to reach and interact with its Target base engaging them with the Brand ideologies and product line.

Arivaa Lifestyle also provides consultancy services to convert your home into a piece of art and sophistication within their budget and not spending a fortune.

Q. What motivates you to start this magazine and what was the idea behind it .

A. I have worked with Livingetc India magazine by Malayala Manorama Group for 8 years. And in between I got diagnosed with Cancer twice and got married too. So somewhere my body was unable to take that much of stress for a full-time job along with my treatment, so I decided to quit. Since I am very much passionate about my work, I couldn't sit at home and doing nothing. So, my husband encouraged me to start my own magazine, that's how we formed Arivaa Group and I started Arivaa Lifestyle.

The idea behind this magazine was to give our readers different options for a makeover or to decorate their new house, penthouse, villas, apartments, at one place by

Q. Has anything changed in your life , post recovery of Breast Cancer ?

A. Yes, I have become more positive and hopeful towards life and very thankful to God. I have a life, and I celebrate everything I have. And most importantly I wanted to contribute something to the society so I enrolled with the breast cancer organizations as a volunteer and advocating for Cancer awareness and support people who work for a similar cause. Many people don't realize or understand exactly how it affects the community, nation and world. By helping clarify and communicate, you help to keep the world focused and fighting against cancer all over the world. Help people recognize the early signs and symptoms of cancer, thus enabling them to seek treatment at an early stage. I have an official insta account (@behindthecancerribbons) The primary goal of it to promote and develop awareness in the public and emphasize the importance of early detection, all of which play a major role in the treatment of cancer. And I would request your readers to come and join the movement.

Q. Can we have a brief about your journey of being Tarot Reader & Reiki Master ?

A. My journey started when I was about 4 years old. I'd say things and they would turn out to be true!! When I was 11 I was given my first tarot deck. It came without a book and it was AN INSTANT CONNECTION! That changed my life!! I did my first professional reading at 15 and quickly realised this was my 'ikigai'. I had a natural connection with crystals they sort of spoke to me. I could sense energies in rooms, homes and that's how I got into healing, one thing led to another and here I am today!!

Freaking people out others tried convincing me it was a 'theory of probability'. Opening up to your gifts is difficult. Thankfully my parents supported me and helped me acknowledge my abilities. God is kind and blessed me with a husband whose support made me from. Today my son introduces me saying, "my mother is tarot reader and a white witch. She makes magical remedies to help people "When I started on this path there wasn't a plethora of information or the internet. I think that helped me because it was just me and the cards. I feel God is kind and blessed me with loved ones who kept me going. My mother gave me my intuition and my dad taught me to stand up for my dreams. I'll quote him here" Believe in yourself and your dreams because if you don't None else will" And ne

Q. Any tips for the younger generation who wants opt for this profession?

A. Thankyou So much for this question- There are a few
1. Many people today see this as a lucrative profession but thos is not something where you fill papers and go home. People take decisions based on your guidance often life changing ones- Understand this before you set out to read for others.
2. Take responsibility practice well before you go professional, also be ethical!! Don't give out baseless or half cooked knowledge to gain followers. Do not mix being an influencer and being a spiritual guide.
3. Be a learner, seeker and MEDITATE!!
